Siobhan Ozard: Second year student wins prestigious National Research Council award.

WISE student looks to the stars

By Bruce Kilpatrick

UVic Physics and Astronomy student Siobhan Ozard is among three British Columbia university students selected for the National Research Council's prestigious new Training Program for Women in Science and Engineering (WISE). Ozard's selection was announced Sept. 24 by the National Research Council (NRC) and the University at a joint news conference held on the UVic campus.

Ozard, 19, is in her second year of studies at UVic. She is one of 32 women from across Canada chosen for the program.

Program participants become employees of the NRC and are eligible for up to \$37,000 in funding over three years. They work for at least four months each year in an NRC laboratory or with an NRC partner. The work will be related to an individual training program developed in

consultation with each participant.

The training program is aimed at increasing the representation of women in science and engineering careers. The winners were selected from among 250 high academic achievers nominated by Canadian university presidents. Candidates were evaluated by a committee of senior research officers from the NRC on their educational achievements, commitment to a career in science or engineering, scholarships, references, and participation in related activities such as science fairs.

Each student is paired with an NRC Research Officer who acts as her mentor for guidance and advice. Ozard's mentor is Dr. James Hesser, Director of the Dominion Astrophysical Observatory in Victoria, and leader of one of the few Canadian projects for the Hubble Telescope which was accepted by NASA.

Six to be honoured at Convocation

Six Canadians outstanding in their fields of endeavours will be recognized at UVic Fall Convocation on Nov. 30. UVic Chancellor Robert G. Rogers will confer honorary degrees upon Bertha Wilson, the first woman named to the Supreme Court of Canada, upon Katie Cooke, research consultant and expert on women and

Native Indian issues, and upon Samuel Sam, Native elder and Grand Chief of the local Tsartlip Band. Honorary degrees will also be conferred upon Francis Winspear, philanthropist, educator and businessman, upon Bruce Brown, art collector and connoisseur, and upon Dr. Sydney (Toby) Jackman (History, retired).

Election brings prof's research to life in class

By Mike Wilkins

The current British Columbia election campaign, ending Oct. 17 when B.C.'s citizens will cast their ballots, is keeping Dr. Norman Ruff of the UVic Political Science Department very busy. B.C. politics and elections are two of his main interests.

"Elections disrupt my academic routine but it's why I became a political scientist in the first place. It's my specialty. I'm used as a source by people looking for commentary but also for information. The media typically have a short memory as does the public.

They call academics for the background," Ruff says.

The election enhances Ruff's fourth year political science course on B.C. politics. "I have not restructured my class. The political events have a relevancy to the class and vice-versa. Within the class there are people working actively for either of the main parties. It is a healthy tension. It is a forum where we can discuss quite deep divisions. I have my personal opinions but I try to stay in the middle. As a discipline we (political scientists) should be addressing contemporary political issues."

Elections can also highlight the usefulness of political science itself, Ruff points out. "There is an opportunity to show how

the insights of political science can deepen the understanding of events. The polls are often misinterpreted by the media that sponsored them. They talk about large swings in public opinion when the swings are all in the margin of error of the polls. Although the media have put their own spin on it, the gap between the parties has remained consistent."

Ruff says this election is typical of Canadian elections. "The media focuses on the horse race. Only 10 days left and only

now we are talking about the issues. The shadow of Bill

"Within the class there are people working actively for either of the main parties. It is a forum where we can discuss quite deep divisions. I have my personal opinions but I try to stay in the middle."

Vander Zalm complicates everything as did the problems with some Social Credit candidates in the first week of the campaign. These have been additional factors leading away from the discussion of the issues."

For Ruff, elections are more than simply additional data. "Without elections there is very little politics. It relates to having an awareness that political science does have insights to offer. It convinces me that I made the right choice to become a political scientist. It is like being a jockey in a horse race. You aren't running yourself but you still have the thrill of participation," he says.

Chemistry will be de-mystified at Open House

Dancing lasers, bubbling spirits and glass with a life of its own will be among the attractions at the UVic Chemistry Open House in the Elliott Building Oct. 19 and 20 from 12 noon to 5 p.m.

The Open House coincides with National Chemistry Week which is designed to help Canadians understand how chemistry has dramatically changed the way we work and live.

The Open House will provide the public with the first opportunity to visit the Chemistry Department's chemical physics laser laboratory, part of the national Network of Centres of Excellence in Molecular and Interfacial Dynamics (CEMAID). CEMAID has headquarters at UVic under the direction of program leader Dr. Terry Gough. It links 46 researchers and their graduate students and post-doctoral fellows from 15 universities across the country. Gough is responsible for coordinating network research and maintaining its standards of scientific excellence. He is also engaged in two of the network's research projects—

Interferometry and Molecular Beam Spectroscopy—which use lasers and infrared light sources to measure the energy levels of molecules.

Elsewhere in the Elliott visitors will be able to have their homemade beer and wine analyzed for its alcohol content and watch glass blown into amazing shapes seldom seen in a scientist's laboratory. The irrepressible Dr. Zonk will entertain children of all ages with experiments guaranteed to make a loud noise.

There will be displays and demonstrations of the use of computers in chemistry study, the production of heat-resistant plastic and the measurement of toxicity in household products. A room will be set aside for chemistry experiments of special interest to youngsters.

Visitors to the Open House will be able to pick up an information brochure listing the times and locations of demonstrations at the Chemistry Kiosk on the second floor landing of the Elliott.

Have you ever wondered how the mercury rose? David Glen (left) and Brian Atwell, from their offices in University Centre, are keeping close watch on the United Way thermometer outside the McKinnon Building. Last week they made the first red mark — at 22 per cent of the campaign goal of \$66,000. Glen and Atwell are hoping that participation in the campaign by the university community will also rise this year.

Tax tip number one for United Way donors

Charitable donations to the campus United Way campaign are eligible for an income tax credit which effectively reduces the cost of each donation made by the donor, reports Brian Atwell (Accounting), who is co-coordinating this year's United Way campaign with David Glen (Record Services.)

Atwell wants to inform potential donors that in British Columbia the combined federal and provincial tax credit applies to the total amount of charitable donations made by an individual during the year. The tax credit is 26 per cent on the first \$250 plus 45 per cent on the remainder.

Grads approve operating funds for Halpern Centre

The new George and Ida Halpern Centre for Graduate Students, the graduate student travel grant fund, and the operating budget of the Graduate Students' Society (GSS) were the beneficiaries as UVic graduate students approved a \$15 per student per term increase in student fees in an Oct. 4 referendum. Nearly 79 per cent of the students voting in the referendum ap-

proved the increase which will take effect in January, 1992. Voter turnout in the referendum was around 12 per cent with 194 of the approximately 1,600 eligible graduate students casting ballots. The increase was approved by 153 students, while 41 students voted no. Of the \$15 increase, \$9 is designated for the Halpern Centre's operating fund, \$3 for the GSS travel grant fund (where each graduate student can draw up to \$250 per year to offset conference costs) and \$3 to the GSS operating budget for the production of handbooks, the organization of social events and other day to day expenses. The GSS executive sought the increase when operating funds for the new building, which opened in July, exceeded projections. Graduate students currently pay \$23 per person per term in GSS fees.

The Ring is published every second Monday during Winter Session at the University of Victoria. The Publisher is Public Relations and Information Services, P.O. Box 3025, Victoria, B.C. V8W 3P2.

Quote

"La Garde meurt, mais ne se rend pas."

"The Guards die but do not surrender."

— General Cambronne (1770-1842)

Attributed to Cambronne when he was called upon to surrender at Waterloo. He later denied the saying at a banquet at Nantes, Sept. 19, 1830.

Professional Staff Association extends membership

UVic's Professional Staff Association (PSA) has opened its membership to confidential staff appointments. Of the 19 people now eligible to join the organization, about half are secretaries to senior administrators and the others are from the personnel office.

The move means that confidential staff may now have their interests represented by the PSA in dealings with the University.

The confidential staff group, which is excluded from membership in campus unions by a decision of the Industrial Relations Council, has been without professional representation on campus until now.

The motion to amend the bylaws and offer membership to the 19 people was presented to more than 50 members attending an association general meeting Sept. 25. It was approved by an overwhelming majority. The motion had been prepared by the executive on instructions from the annual general meeting held in May. Prior to the amendment, membership in the PSA extended only to academic and administrative professional staff or continuing specialist instructional staff.

PSA president Kim McGowan (Campus

Planning) said that, in putting forward the motion, the PSA was acting on a request from the confidential staff group. "They felt themselves to be the voiceless ones on campus and that the backing of the asso-

ciation would give them more sturdy representation."

"They felt themselves to be the voiceless ones on campus and that the backing of the association would give them more sturdy representation."

McGowan acknowledges that there was opposition to the amendment at the annual general meeting in May, some of it "quite vigorous."

Membership in the PSA is voluntary. It stands at over 50 per cent out of a potential membership of approximately 250 employees in the UVic administrative and academic professional group.

The general meeting also received reports from the PSA's Salary and Classification Committee, which is compiling a 10-year historical database comparing the salaries of PSA members to other employee groups at UVic and to their counterparts at UBC and SFU; the Benefits Committee, which is collecting information on various benefits available at other B.C. universities; and the Terms of Appointment Document Committee which will be circulating information to all PSA members about its draft proposal to the University administration.

An invitation to wellness

Surprises and gifts offered along with health checks

Learn how to live a healthy lifestyle at UVic's Wellness Fair Oct. 15-16 from 9 a.m. to 3:30 p.m. in the University Centre lobby. Fifteen on and off campus groups will offer displays, information and advice on maintaining good health and a positive outlook. The fair's focus is on students, but university staff and faculty are also invited to visit the displays and check their blood pressure, analyze the nutritional content of their lunch and learn about the fitness programs offered through Athletics and Recreational Services.

Among the groups represented at this year's Wellness Fair are AIDS Vancouver

Island, B.C. Lung Association and Mothers Against Drunk Drivers (MADD). UVic Counselling Services will explain the services it offers on campus, Occupational Health and Safety will explain the potential health hazards in products used by artists and Capital Regional District dental hygienists will distribute advice and tooth care products. Chaplains Services will have a representative at the fair, the UVic Bookstore will display some healthy reading material and University Health Services will offer a game of fortune with a timely difference.

The Wellness Fair committee promises many surprises and free gifts throughout the two day event.

Student employment centre stays open

UVic will operate a year-round student employment centre to replace the Canada Employment Centre that was formally closed by the federal government on Sept. 27. Staff member Ivy Reid has been seconded from the Employment and Immigration Commission to assist with the transition. She will be joined on an interim basis by David Clode, Associate Director of Student Services.

A new manager is expected to be hired within the next few weeks to begin the work of fully integrating the Student Employment Centre as a department under the Student and Ancillary Services Division. The Centre will continue to perform the same functions as those delivered previously by the federal government.

REduce use cycle port

If you are swimming in the McKinnon Pool, chances are that you are swimming in solar-heated waters. In 1982, 173 solar panels were installed on the roof of the McKinnon Building and have been heating the pool when the temperature is above 10 degrees Fahrenheit ever since. The panels were upgraded in 1988. Maintenance costs are considerable but without question the solar panel system saves energy costs, reports James Pearce (Buildings & Grounds).

Fall Convocation to be held Nov. 30

Fall Convocation this year takes place on Nov. 30. There will be one ceremony at 10 a.m. and a second ceremony at 2 p.m.

Graduation packages were mailed out the first week of October. Further information may be obtained from the Ceremonies Office in Room 113, University House 2, 3775 Haro Road, or by telephone at 721-7445 or 721-7446.

Dream of Fairfield resident lives on through scholarship and bursary

Aspiring writers will benefit

By Patty Pitts

Hazel Partridge-Smith loved to write. She remembered the tales her father told her about being a pioneer in Fort Victoria, and she wrote them down. They were later produced as a series of short stories on CBC radio. She also wrote a column for the *Oak Bay Leader*. When Partridge-Smith died earlier this year at age 88, her niece remembered her aunt's love of writing and created a scholarship and a bursary in her name.

The Hazel Partridge-Smith Bursary in Creative Writing will be awarded to a second, third or fourth year student in Creative Writing at UVic. An outstanding second, third or fourth year student in the same department will be the recipient of the Hazel Partridge-Smith Scholarship in Creative Writing. The amount of the awards, to be presented next year, hasn't yet been decided. The awards will be distributed from an endowment of \$40,000 which is eligible for provincial government matching funds.

"She was the brightest, most cheerful person," says Gertrude Dennis of her aunt who was a graduate of Victoria High School. "She lived 60 years in her house on Bond Street in Fairfield and had so many friends."

It was Dennis who read her aunt's stories on CBC radio. As executor of her aunt's estate, she decided the most fitting way of remembering her aunt was to offer a new generation of aspiring writers the opportunity to pursue the same dream dreamed by Hazel Partridge-Smith.

Women Scholars Lecture Series

Female musicians in Mozart's time

Viennese musicologist Dr. Eva Badura-Skoda will speak at UVic on Oct. 24 as part of the University's contribution to the international commemoration of the 200th anniversary of Mozart's death. The lecture will be at 8 p.m. in the Phillip T. Young Recital Hall in the School of Music.

In her lecture on Female Instrumentalists in Mozart's Time Badura-Skoda will focus on the musical accomplishments of Nannerl Mozart and Regina Strinasacchi. She will richly illustrate her talk with a video, slides, and musical examples. This will be the sixth lecture in the Women Scholars Series established by the Office of the UVic Vice-President, Academic. It is free and open to the public

Centre sustains an interest in global development

By Bruce Kilpatrick

The quiet, forested setting of University House #4 contrasts sharply with the buzz of activity surrounding the operations of UVic's Centre for Sustainable Regional Development (CSRD), one of the University's newest interdisciplinary research centres. Although tucked away on Haro Road on the far eastern reaches of the campus, the Centre is plugged directly into the middle of global concerns and key environmental issues at the provincial, national and international levels.

"The Centre wants to be recognized as a leading research centre in sustainable development both nationally and internationally," says CSRD Executive Director Dr. Stephen Loneragan (Geography), about the now 10-month old centre. "We've already travelled a long way toward accomplishing that goal."

According to Loneragan, those at the Centre define sustainable development as that which meets the needs of present generations without sacrificing the ability of future generations to meet theirs. Important components of the sustainability concept include preserving resources to benefit future generations and measuring the full environmental and social cost of resource use. The regional, sub-national level was chosen as the most appropriate area for study.

"We want to empower local communities to undertake sustainable activities that not only benefit them, but that, in the long term, benefit B.C., Canada and the globe."

"The notion of sustainability changes with scale and from place to place," says Loneragan. "Sustainable development in Bangladesh is very different from sustainable development in B.C. Locally, the problems are very different. We want to empower local communities to undertake sustainable activities that not only benefit them, but that, in the long term, benefit B.C., Canada and the globe. It all goes hand in hand."

The Centre's activities are currently distributed among four research programs: the Sustainable Communities Initiative, Global Environmental Change, State of the Environment Reporting and Land Use Change. "We have all the work we can handle right now," says Loneragan. With the United Nations Conference on Environment and Development looming in Rio de Janeiro in June 1992, the Centre has also become a supplier of information to various governments, U.N. agencies and programs, and Environment Canada. The conference, which will examine topics ranging from international protocols to reduce world-wide emissions of carbon dioxide to strategies for reducing global poverty, will involve the heads of state of more than 50 governments.

The Centre's Sustainable Communities Initiative is in the midst of an 18-month, \$500,000 provincially-funded project to design an information system that will function as a decision support framework for individuals, groups, and local governments interested in sustainable community development. The project is led by Dr. Gerald Walter (Economics). Those concerned about the sustainability of communities will be able to discover relevant

initiatives which have been undertaken by other communities in B.C., Canada or around the world. The emphasis, however, is on B.C. "It will be a detailed, comprehensive database of individuals, institutes and materials," says Loneragan. "Lots of people are putting databases together but our design is focussed upon environmental and social development issues, selectively aimed at the community level. It will include hard to locate working papers and documents from government and private sector sources." The information system will be housed permanently at the Centre. A region of Vancouver Island will be selected as an initial case study to assist in the design and implementation to ensure that the system serves community needs.

The Global Environmental Change research program, under the direction of Loneragan, currently consists of three funded projects—assessing the social and economic impact of climate warming on the Canadian Arctic and the Mackenzie River Valley (the impact of warming on Arctic communities, on energy supply and demand and on transportation); the relationship between poverty and environmental degradation in Southeast Asia (urban poverty and urban-rural migration in the Third World, gender and development, and the effect of the international debt crisis on resource depletion); and Environment and Security (water resources and security in the Middle East).

The State of the Environment Reporting program is headed by Dr. Paul West (Chemistry). Together with the B.C. Ministry of Environment, the program aims to establish a "state of the environment in the province" report using natural resource accounting and environmental indicators to better understand the relationship between economic growth and environmental change.

important components of the sustainability concept include preserving resources to benefit future generations and measuring the full environmental and social cost of resource use.

The fourth research area—Land Use Change, under the direction of Dr. Olaf Neimann (Geography)—is at the proposal stage, with old growth forest mapping in B.C. using satellite data as the first project awaiting funding approval.

Loneragan estimates that 80 per cent of the Centre's activities will be devoted to research. The remaining portion will be spent acting as a facilitator to sustainable development efforts on campus such as the Vancouver Island Public Research Group's recycling proposal to the federal government, playing a co-ordinating role on community workshops such as the one on alternate transportation which will be held

Loneragan

in Victoria in the spring of 1992, and serving as an "explicit link to the Victoria community" by speaking to community

"Lots of people are putting databases together but our design is focussed upon environmental and social development issues, selectively aimed at the community level. It will include hard to locate working papers and documents from government and private sector sources."

groups or participating in projects such as the Capital Regional District Task Force on Atmospheric Change.

"We want to be recognized as a useful resource for the community and the province," says Loneragan. "UVic has the potential to truly be a world leader in environmental research. We expect to play a pivotal role in that."

The Centre receives base funding as well as non-recurring funds from the University. Other funds come from research contracts.

Loneragan's three-year term as Executive Director began July 1. The Centre was given approval to operate for five years effective Jan. 1 by the UVic Senate. The Centre reports to the Dean of Social Sciences.

Teachers in residence – a new tradition

Artists in Residence. Writers in Residence. These are not uncommon titles in academe as universities bridge the gap between the campus and the community at large. Now UVic has established a new title—Teachers in Residence. Six teachers from the province have been selected from more than 150 applicants to join the Faculty of Education for one or two years to assist the Faculty in preparing teachers. Dr. Robert Fowler, Dean of Education, is enthusiastic about the new title and the quality of the six teachers selected by departments to fill these positions.

"It is vital that we get experienced teachers from the schools who know how to implement the new Year 2000 programs."

"As the University of Victoria is in the midst of reviewing and changing its teacher preparation programs, it is vital that we get experienced teachers from the schools who know how to implement the new Year 2000 programs." Adds Fowler, "Now, thanks to the co-operation of the school districts, we have some of the very best to provide advice and to work with our students in the schools."

The six teachers selected for the new program are: David Dunnet from Victoria, Betty Milne from Duncan, Kathleen Gregory from Sooke, Anetta Probst from Victoria, Linda Leibel from Nanaimo and Michael McComb from Courtenay.

Dunnet is well known locally as music teacher and band director at Oak Bay Secondary School. He was recently selected as the outstanding music teacher in B.C. by his provincial music colleagues.

Milne was also cited for outstanding service, in mathematics. He is vice-principal of Cowichan Secondary School in Duncan.

The Faculty of Education will consult with these teachers on appropriate changes to be made in teacher preparation.

Gregory is intermediate co-ordinator in Sooke and previously served with the Ministry of Education as part of the Intermediate Program Development Team.

Probst is primary co-ordinator in Victoria and has worked with teachers throughout Victoria to implement the new primary program.

Leibel is an elementary counsellor in Nanaimo and will work with student teachers in the Professional Studies Division.

McComb is the district physical education co-ordinator for Courtenay. His program has been recognized as one of the strongest from primary through secondary in the province.

All of the teachers in residence have advanced degrees in the academic fields.

The teachers in residence will teach pre-professional and professional year courses as well as supervise student teachers in their practical work in the schools. The Faculty of Education will consult with these teachers on appropriate changes to be made in teacher preparation to meet the new provincial initiatives and collaborate with them on field based research, while the teachers in residence serve as consultants to their own districts on educational innovations.

Petersen

otherapist, four community specialists in dermatology, gynecology and orthopedic surgery who visit the clinic regularly, four nurses and four support staff. Together they treat between 120 to 160 students a day.

"The complaints haven't changed much," says Petersen. "We still see a lot of minor injuries and respiratory infections, although our direction has changed over the years. We deal a lot more with issues about contraception and sexually transmitted diseases."

When Petersen assumed directorship of health services 30 years ago this fall, the recently-released birth control pill was causing heated debate on university campuses. At a meeting of university health services directors, he was surprised to learn that he was the only one in the province prescribing it.

"Initially, we required the students to produce permission from their parents," remembers Petersen. "That policy lasted one year. After that, we just used our own judgement."

He says that 30 years of UVic administrators have been consistently supportive. His only complaint is that the recent relocation of physiotherapy from the McKinnon Building to the current Health Services Building has diminished the clinic's space.

But it will never be too crowded for Petersen.

"I'd never leave UVic," he confesses. "I love it here."

By Patty Pitts

Patients seeking treatment at the Victoria College medical clinic 30 years ago were surprised to see that its director was the same age as they were.

"I was as young as the students when I first arrived," remembers Dr. Jack Petersen of his early days as a part time campus physician. "I was first hired right out of internship to do medicals on first year students. The following year the director of health services left, and I applied for the position."

Three decades later Petersen is still the director of University Health Services, but that's the only thing that's remained the same throughout his 30 years in the position. His first clinic was an office, divided into two examining rooms by a partition, located on the College's Lansdowne Campus. His contract called for 100 hours of work every 12 months and provided one nurse for assistance.

Petersen's campus position became full time in 1975. His staff has since grown to 13 physicians — nine part-time general practitioners and four part-time psychiatrists. They work with a full-time physi-

Law Faculty helps organize West Coast Law Fair

Members of minority groups will be informed about legal education opportunities

UVic's Faculty of Law will be among the participants at West Coast Law Fair '91, to be held at the Pan Pacific Hotel in Vancouver on Nov. 1, from noon until 9 p.m. The law fair is an opportunity for anyone who is interested in pursuing a legal education to obtain information about Canadian law schools in one convenient location.

The Faculty has been instrumental in organizing this year's fair, the first to be held on the West Coast. Admission advisors from participating law schools will be in attendance to answer specific questions about the academic focus of their respective schools and deal with concerns of potential applicants. Brochures and application packages will also be available.

One of the primary goals of this year's fair is to inform members of Canada's minority groups about legal education opportunities and encourage them to enrol in law schools at the country's universities.

The following law schools will be participating in West Coast Law Fair '91: University of Alberta, University of Calgary, Dalhousie University, McGill University, University of New Brunswick, Osgoode Hall (York University), University of Ottawa, Queen's University, University of Saskatchewan, University of Toronto, University of Western Ontario, University of Windsor, UBC and UVic.

The Dining Room is set to open

A cast of six versatile actors will portray over 50 characters in a series of snapshots of a time when many important moments in family life took place in The Dining Room. The play of this name, opening at the Phoenix Theatre on Oct. 17, is directed by Dr. Giles Hoyga. Set design is by Allan Stichbury with Michael Meloche as associate designer, lighting by Bruce Watson, costumes by Karen Levis and sound design by Samantha Wheeldon. Above (left to right) Ed Belanger, Tim Sutherland, Caitlin Callahan and Zoe Heath portray a scene from The Dining Room. Colin Legge and Janet MacDonald make up the cast of six. Reservations may be made by calling 721-8000 Monday through Saturday from 12 to 3 p.m. and 6 to 8 p.m. **Leo Wieser photo**

Participants in the cultural-educational exchange on growing old in Canada and Japan share a few informal moments on the first morning of the event. Japanese visitors were bright and cheerful despite being up all night during the long flight. One Canadian was from Calgary.

Photo by Joyce Howrigan

Growing older in Canada and Japan

Exchanges are seen as part of a greater world movement to break down barriers between countries

By Joyce Howrigan

Growing older in Canada and Japan has many similarities. There are also some significant differences seniors from both countries discovered when they met to discuss retirement and other seniors' issues during a colloquium on aging held on Oct. 4 and 5 at UVic.

The event was sponsored by the Centre on Aging at UVic and the Victoria Gerontology Association, with co-sponsorship by T.V. Osaka and International Publishing and Educational Communication Inc. (IPEC). An Osaka television crew filmed activities for broadcast in Japan.

The conference brought together 40 people from Japan and 55 from Canada for an educational-cultural exchange. While seniors were represented in both groups, many of the Japanese were just approaching retirement age or, in some cases, were attending the conference because they were caring for older relatives.

Cultural activities on the second day of the conference included lawn bowling, curling and a cooking demonstration at Sooke Harbour House. According to two of the conference organizers, Koji Ito

(IPEC) and Dr. Elaine Gallagher (Nursing), former Acting Director of the Centre on Aging, the curling in particular offered a unique cultural experience for the Japanese. It also provided a great opportunity for friendships to develop between the two groups.

"Some of the overseas visitors told us that curling was 'good exercise' and that they had used muscles they didn't know they had," Gallagher said.

Koji Ito agreed that many in the Japanese group had mentioned how strenuous the sport is. Ito also said that even though many of them had seen curling on television, they were fearful of trying it until their Canadian counterparts offered help. "Then," he said, "the two groups became closer friends."

Lawn bowling offered another good opportunity for cultural exchange. "The visitors from Japan enjoyed the sociability of lawn bowling," said Gallagher. "Also, many were surprised that here in Canada people in their 70s and 80s are still active enough to be able to play the game."

The curling and lawn bowling were popular with the Japanese, Ito said, because there are not many physical activities for older people in Japan. "The sports also provided opportunities for the groups to mix and talk about lifestyles in their respective countries. The Japanese people see these exchanges as part of a greater world movement to break down barriers between countries," he said.

The educational aspects of the exchange included talks by UVic's Dr. Jean Veevers (Sociology); Masaaki Yamanaka, from the Osaka Prefectural Office; Joe Bourque, tax and retirement investments expert; and Kazuyuki Izumi, businessman and lecturer.

In her talk, Veevers identified a number of trends that are certain to have a significant impact on lifestyles in both Canada and Japan. Among them is the shift from a predominantly younger to a predominantly older population. The residency patterns of aging parents and offspring are also changing. Veevers said that in Canada and the US, co-residency is increasing, but in Japan, the trend is for fewer elderly people to be living with their children, although

the percentage is still higher than in Canada or the US.

Yamanaka pointed out that because more older people are not living with their families, the Japanese people are having to learn "intimacy at a distance" and how to be close, to love, care for and support each other without living together.

The evening's entertainment at the farewell reception offered a cross-section of Canadian culture. Artist and story teller Marion Stavrakov gave an historical perspective of life in British Columbia. Also on the program were the Bon Accord Scottish Country Dancers, the Lynn Griffiths Dancers, singer Hugh Sinnott accompanied by Pat Robertson, and pipers Larry Munro, Lorraine Munro, and Brian Barnes.

The Japanese visitors were especially impressed with the Scottish dancers, Ito said. "It was a good way to say good-bye."

The colloquium was the third held in Canada; the others were at the UBC and SFU.

Photo from India brings mystery to University Archives

"Do you like Kipling, sir?" "I don't believe I've ever kiplled, madam!" Rudyard Kipling, far left, puts in a surprise appearance in this mysterious photo found among the old Bastion Theatre papers donated last year to University Archives. Archivist Chris Petter says the photo was found among the papers of the estate of Luella Goddard. It is signed by Kipling and carries the inscription "Scene from 'The Squire,' Simla 1887." Simla is in India. Can any of our readers help shed further light on this bit of Victoriana?

Who's in charge around here, anyway?

Well if it's the Student Union Building you're interested in, the ruling group has to include the six people pictured to the left. This year's UVic Students' Society (UVSS) executive (top photo) is comprised of (from left to right) Director of Finance Marne Jensen, Director of Academics Jacquie Best, Chairperson Oona Padgham and Director of Services Tom McReynolds. The executive's goals for the year include balancing the UVSS budget, opening up the Society to greater student participation, raising awareness about post-secondary issues within the University, in the community and within government, tackling the issues of student loans, tuition levels, lack of funding for post-secondary education and childcare, seeing completion of the SUB get underway, and making UVSS operations more environmentally responsible. The executive's one year term of office expires April 30, 1992. Meanwhile on the media front, this year's Martlet co-editors are Alisa Gordaneer (left) and James MacKinnon (right). The pair are still experimenting with the design of the paper and plan to focus less on student politics than the Martlet has in the past. According to Gordaneer, the change in focus for the paper is because internal UVSS politics don't address the issues of greatest importance to students. "The politicians to be watched now aren't the student politicians," she says. MacKinnon and Gordaneer say that due to a large turnover in staff resulting from graduations, the Martlet is much more politically diverse than it has been in the past. "There's a good open atmosphere in the office," says MacKinnon. The co-editors intend to cover "University administration issues" since "they [the Administration] are the ones with the real power in this place," says Gordaneer. "Most students don't know how what [the Administration] does affects them. We want to bring that to the fore," MacKinnon says.

Hospital bed refit kit wins award

Design by mechanical engineering students in continual use at Gorge Road Hospital for nine months

A hospital bed refit kit designed by five students who were enrolled in a UVic mechanical engineering course last year won second place in the 1991 Canadian Society of Mechanical Engineering Student Design Competition held in Winnipeg in June.

Colin Cronkhite, James Fraser, Chris Grieve, Markus Hirschbold and Derrick Huber were second year students in MECH 260: Introduction to Engineering Design, when they participated in a class project that called for design modification of a hospital bed. The group later submitted their design for a refit kit to the competition.

Prof. Gerard (Ged) McLean, (Mechanical Engineering) who taught the class said the challenge was to design a bed for the Gorge Road Hospital that would be low enough for patients to transfer themselves easily and safely between wheelchair and bed, yet have the height and mobility needed for care givers to comfortably attend patients. Specifications also stipulated that the bed be durable and move easily between the higher and lower positions.

Huber and Hirschbold represented their group at the Winnipeg competition where they showed a video and gave an oral presentation of the kit. The students estimated that each kit can be marketed for approximately \$300, and will extend the functional life of a hospital bed in long-term health facilities by 10 years. The bed modification primarily consists of remov-

ing the lower frame and lifting arm assemblies and installing re-designed lifting arms. Rather than flat steel tubing normally used for the lifting arms, the students chose square steel tubing, which is more resistant to twisting and bending stresses, thereby extending the life of the bed. Packaged as a kit, the modifications can be installed by hospital maintenance staff in about an hour, the students' design proposal says.

A prototype of the design-winning bed and a second prototype completed by another group in the class have been used at the Gorge Road Hospital since last January. Both were to have been given a four-month evaluation by the hospital, however, the evaluations have not yet been completed, McLean said.

"The beds were pressed into regular service to meet the personal needs of two residents and have been in continuous use for nine months now. Keep in mind that these were prototypes, and often represented the students' first attempt to build anything at all. It is a credit to them that these prototypes are still going strong," he said.

The course concept, developed by McLean, was to teach design by having students participate in a "real-world," practical project, using the lessons learned from the project to draw out the general "philosophical" principles of design. The course has since been moved to third year and will be offered in January, 1992, as MECH 350: Engineering Design: 1.

Campus campaigning attracted a standing-room only crowd, both inside and outside Cinecenta, when the UVic Students' Society hosted a provincial candidates meeting Oct. 3. A more than capacity crowd showed up to hear candidates from the ridings of Oak Bay-Gordon Head and Saanich South debate issues of concern to the voters who will elect a new provincial government Oct. 17. Photo by Patty Pitts.

The Board of Governors reports the following proceedings from the regular meeting held on 13 September 1991, effective as shown.

RESIGNATIONS AND EARLY RETIREMENTS

W. Keith Hastings, Associate Professor, Department of Mathematics and Statistics, 30 June 1992 (early retirement);

Priscilla R. Scott, Director, Library Staff Relations 31 December 1991 (early retirement).

NEW APPOINTMENTS - FACULTY

Colin H. Bradley, B.A. Sc. (Brit. Col.), M.S. (Heriot-Watt), appointed Visiting Lecturer, Department of Mechanical Engineering, 1 January 1992 to 31 December 1992;

A. Rodney Dobell, B.A., M.A. (Brit. Col.), Ph.D. (M.I.T.), appointed Professor, School of Public Administration and Francis Winspear Chair in Public Policy, 1 July 1991;

Paul F. Hoffman, B.Sc. (McM.), M.S., Ph.D. (Johns H.), appointed professor, School of Earth and Ocean Sciences, 1 July 1992;

Valerie King, A.B. (Prin.), J.D., Ph.D. (Calif., Berkeley), appointed Assistant Professor, Department of Computer Science, 1 July 1992 to 30 June 1995;

Charles J. Konzelman, B.Sc. (Man.), M.A.Sc. (Tor.), appointed Visiting Lecturer, Department of Mechanical Engineering, 1 January 1992 to 31 December 1992;

Xianguo Li, B.Eng. (Tianjin U.), M.Sc., Ph.D. (Northw.), appointed Assistant Professor, Department of Mechanical Engineering, 1 January 1992 to 30 June 1995.

School of Earth and Ocean Sciences

The following faculty, from the Departments shown, were appointed to the School of Earth and Ocean Sciences, effective 1 July 1991:

Christopher R. Barnes, Department of Geography, appointed Professor;

Christopher J. R. Garrett, Department of Physics and Astronomy (Lansdowne Professor of Ocean Physics), appointed Professor;

George Spence, Department of Physics and Astronomy (University Research Fellow), appointed Adjunct Assistant Professor;

David F. Strong, Department of Geography, appointed Professor;

Verena J. Tunnicliffe, Department of Biology, appointed Associate Professor;

Eileen van der Flier-Keller, Department of Geography, appointed Associate Professor;

John T. Weaver, department of Physics and Astronomy, appointed Professor;

Michael J. Whiticar, Department of Geography, appointed Assistant Professor.

Senior Instructors

Gerald V. Baillargeon, B.A., M.A. (Windsor), Ph.D. (Brit. Col.), Department of English, 1 September 1991 to 31 August 1995;

J. Douglas Beardsley, B.A. (U. of Vic.), M.A. (York), Department of English, 1 September 1991 to 31 August 1995;

Lucie Daigle, B.A. (Laval), M.A. (U. of Vic.), Department of French Language and Literature, 1 September 1991 to 31 August 1993;

Yasuko Y. France, M.A. (Mass.), Department of Pacific and Asian Studies, 1 September 1991 to 31 August 1995;

Jean-Paul Mas, B.Phil. (Caen), M.A. (Louisiana St.), Department of French Language and Literature, 1 September 1991 to 31 August 1995;

Claire McKenzie, B.A., M.A. (U. of Vic.), Department of English, 1 September 1991 to 31 August 1995;

K. Dawn Neill, B.A. (Trent), M.A. (U. of Vic.), Department of English, 1 September 1991 to 31 August 1995;

Audrey J. Neufeldt, B.A. (Brit. Col.), M.A. (Wash.), Department of English, 1 September 1991 to 31 August 1995;

Rosa L. Stewart, B.A. (Ohio Wesleyan), M.A. (Mich.), Department of Hispanic and Italian Studies, 1 September 1991 to 31 August 1995;

Judith A. Terry, B.A. (Leic.), M.Phil. (Lond.), Department of English, 1 September 1991 to 31 August 1995.

NEW APPOINTMENTS - ADMINISTRATIVE AND ACADEMIC PROFESSIONAL

Sheila M. Devine, B.A., B.Ed. (Nfld.), LL.B. (Windsor), appointed Assistant to the President, Equity Issues, 16 September 1991.

SPECIAL APPOINTMENTS

Acting Associate Dean

C. Robert Miers, Professor, Department of Mathematics and Statistics, appointed Acting Associate Dean of Graduate Studies, 1 September 1991 to 30 June 1992.

Director

Andrew Farquharson, Professor, School of Social Work, reappointed Director, Learning and Teaching Centre, 1 July 1991 to 30 June 1992.

Acting Directors

Mary L. Richmond, B.N. (McG.), M.A. (Col.), appointed Acting Director, School of Nursing;

Phyllis M. Senese, Assistant Professor, Department of History, appointed Interim Director, Centre for Studies in Religion and Society, 1 July 1991 to 30 June 1992;

W. Michael Brooke, Director of Program Development, University Extension, appointed Acting Director, University Extension and Community Relations, 1 August 1991 to 30 June 1992;

Wes J. Koczka, Program Coordinator - Education Extension, appointed Acting Director of Program Development, University Extension and Community Relations, 1 August 1991 to 31 August 1992;

Brishkai Lund, Senior Program Coordinator - Arts and Science, Women's and Seniors' Programs, appointed Acting Director of Program Development, University Extension and Community Relations, 1 July 1991 to 30 June 1992;

Gus Agostinis, Program Assistant - Education Extension, appointed Acting Program Coordinator - Education Extension, University Extension and Community Relations, 1 August 1991 to 30 June 1992;

Peggy Faulds, Program Assistant - Arts and Science, Women's and Seniors' Programs, appointed Acting Program Coordinator, Arts and Science, Women's and Seniors' Programs, University Extension and Community Relations, 1 July 1991 to 30 June 1992.

Ringers

Dr. Graham Branton (Co-operative Education) was presented with the Distinguished Research Award by the Canadian Association For Co-operative Education (CAFCE) at its national conference in London, Ont., this August. "This honour was bestowed upon Dr. Branton "because he has made such a significant contribution to the development of co-op education in Canada over the years," says CAFCE Awards Committee Chair Stuart Koch. "The award was presented to recognize Graham's research efforts in particular, but he has also served on several CAFCE committees including the position of Chair of the B.C. Committee. He is a very respected member across the country and has always been an excellent representative of the University."

Dr. Paul Fisher and Rudl Samoszynski (Health Information Science) visited Fiji in June. They were invited by the Fiji Minister for Health to create a joint project to develop a community health information system for Fiji. Fisher and Samoszynski visited nursing stations, area health centres, and hospitals in the company of the minister and other officials. The settings ranged from remote nursing stations accessible only by boat to urban primary care hospitals. The development of the proposal from the Fiji School of Medicine was supported in part by a grant from UVic's Centre for Asia-Pacific Initiatives.

In the 1991 Paris-Brest-Paris Randonee, Prof. Gerard (Ged) McLean (Mechanical Engineering) came first of the 28 B.C. riders and second of the 88 Canadians participating in this grueling 1,218 km cycling rally. McLean completed the course in 64 hours and 34 minutes. He broke the previous Canadian record by 40 minutes, coming second to a Montreal rider who finished approximately 15 minutes ahead of him. The rally took place Aug. 26-29 through the lush, rolling countryside of Brittany. There were approximately 3,500 entrants. Keeping with tradition, the riders had to complete the course in 90 hours, from departure to return, which included stopping time at check points and for rest, sleep, eating, bicycle repairs, or any of the other unscheduled events that can happen along the way. This year, riders had to contend with temperatures of 35 degrees Celsius during the day, cold nights, and a steady head wind on the 600 km ride back to Paris. No prizes are given, but there are rewards of camaraderie and self-satisfaction, says McLean. At one point, he rode in a multi-lingual paceline with Norwegians, Swedes, Spaniards, Italians, Americans, Australians and the sole entrant from Kiwi. "Fantastic" is how McLean felt at the end of the race.

So how much does Prof. Andrew Pirie (Law) remind you of Henry Fonda? You'll get to check out the resemblance Oct. 16-19 at the Kaleidoscope Playhouse when Pirie takes the stage as part of the Kaleidoscope Theatre production of *Twelve Angry Men*. All of the actors in the play are members of the Victoria legal community: law professors, judges, prosecutors, defence lawyers, and bureaucrats. The production is a fund-raiser for Kaleidoscope. Pirie will be playing the lead role that Fonda brought to life in the 1957 Sidney Lumet film version of the play. The action takes place within a jury room where Pirie plays the lone holdout for a not guilty verdict as the 12 members of the jury begin their deliberations about the guilt or innocence of a young man charged with murder. Pirie says that the issues raised during the subsequent conflict within the jury relate to the current issues of wrongful convictions and capital punishment. While a regular theatre-goer, Pirie has not acted since his high school days when he was involved in productions of *Arsenic and Old Lace* and *Murder on the Orient Express*. UVic alumni Susan Beach and Jennifer McCormick also appear in the play. Performances begin at 8 p.m. For tickets or information call 383-8124.

Dr. Louis A. Hobson (Biology) has been elected President of the Canadian Meteorological and Oceanographic Society. He also serves as a member of the Canadian National Committee of the Scientific Committee for Ocean Research, UNESCO, and participates in a Vancouver-based citizen's forum concerned with environmental degradation.

Line ups expected for Doris Lessing

A large crowd is expected to attend when British author Doris Lessing speaks in UVic's University Centre Auditorium Oct. 16 at 8 p.m. The lecture, part of the President's Distinguished Lectures series, is free and open to the public. Lessing's topic will be "Literature as a Metaphor." She will read from her works and will take questions from the audience.

Lessing earned international recognition with her first novel, *The Grass Is Singing*, in 1950. Since then she has won numerous literary awards in Britain and Europe.

Letter

Affirmative action not to be called equal opportunity, Prof requests

Editor, The Ring

I write in response to your article about Dr. Norma Mickelson's report on Women's Academic Issues. Dr. Mickelson has accomplished a great deal—I congratulate her on her recent award and wish her well. I would, however, take exception to two points made in her report.

First, she argues that she is essentially concerned about "equal opportunity for women in the Academy." I am sure that this is so, but I am unsure as to how her endorsement of offering many academic appointments only to women conforms to that principle. There may be a good case to make in favour of preference to women or exclusion of men, but let us not label such actions "equal opportunity".

Secondly, Dr. Mickelson dismisses critics as "a small core of individuals who appear to feel threatened by the initiatives being taken." This is a peculiar statement to make in a university environment, particularly regarding an issue (affirmative action) that has stimulated so much sophisticated intellectual debate in North America, including arguments before the American Supreme Court.

I would hope that we can continue to have reasoned discussion regarding such issues by people on all sides who are willing to respect their opponents' integrity. Most of us, I am sure, are primarily concerned about the long-term welfare of this University, including its reputation for fairness.

W.T. Wooley
History.

Senate will be tape recorded

Senate, at its Oct. 2 meeting, approved a proposal from University Secretary Sheila Sheldon Collyer that Senate meetings be taped in future.

The tapes will not be transcribed but will be available if discussion arises about a section of the minutes. The tapes will be destroyed after the minutes of a meeting have been approved at a subsequent meeting, Sheldon Collyer explained to Senators.

The taping will be done with the use of five microphones that will be placed on the walls of the Senate Chambers. "They will be very unobtrusive," Sheldon Collyer assured Senators.

Before the vote was carried, Senator Reg Mitchell (Chemistry) quipped: "I think it will be highly useful. I have often thought that the minutes were abridged and didn't report what I had actually said."

Convert your videos on campus

UVic TV Services can now convert those videos you brought home from Britain (or anywhere else in the world) so they can be viewed on a standard North American VCR.

Throughout the world, formats like PAL, M-PAL and SECAM are used instead of the NTSC format adopted by North

America. UVic TV Services can convert any of them for use on a North American VCR. The cost to convert a typical video tape is \$14.95 an hour. It is also possible to convert a Canadian or American video tape to any one of the standard formats used outside North America. Please call TV Services at 721-8279 for more information.

Calendar

All events are free unless otherwise indicated. Submission deadline for the next issue is October 22.
